Pionite®

Jaeckle Distributors is the largest distributor of Pionite Decorative Surfaces, with distribution centers in Madison, Wisconsin; Des Plaines, Illinois; St. Louis, Missouri; and Minneapolis, Minnesota.

We stock several different sizes in postforming, general purpose and vertical grades, available in more than 240 Pionite colors and available special order in over 100 Panolam HPL colors.

NEW PRODUCTS INCLUDE:

Motion Collection

Colors that keep pace with your creativity!

- AR350 Brick by Brick**
- AV250 Passin Through**
- AT700 Groundswell**
- AT710 Gold Pannin**
- AT680 Travelin Light**
- AT650 Cavalcade South**
- AV110 Tropical Getaway**
- AO360 Summer Heat Wave**
- AT660 Crisscross**
- AG031 First N Main**
- AG041 Shooting Star**
- AT420 Setting Sun**
- AT430 Days End**
- AT425 Sunny Side**
- WX110 Smooth Paddlin**
- WF181 Ice Fishin**
- WP120 Leave Likatre**
- WP110 Looks Likatre**
- WP115 Appears Likatre**
- WP125 Seems Likatre**
- WX230 Opto Printatre**

** Please note any of Pionite's 240 colors are available in these new finishes with only a 1 sheet minimum (size restrictions apply).*

StoneX:

A combined natural and polished finish that allows a design to come alive with an extra dimension of depth that is just not possible with single textured finish. Our StoneX finish, with a slightly decreased gloss level and lessened differential of "hi and low" spots within textures, allows for a durable and very cleanable surface. As stated, ideal for residential use and equally viable for commercial applications.

Granite:

Polished textured finish that takes the HiBrite finish to a new level by adding an element of stone/granite texture. Enhances "stone" laminates with extra depth and enables other near solids to give a visual look of concrete with an extra dimension of natural finish qualities.

Custom Laminate

Jaeckle Distributors continues to offer Pionite's Custom Laminate Program including:

Digital Printing

- Unlimited number of colors
- White base provides enhanced overlay clarity
- 5 sheet minimum quantity
- Ideal for tabletops, store fixtures, murals and any full-color imaging.

Screen Printing

- Can match most Pantone colors
- Available in all Pionite colors
- Ideal for store fixtures, corporate identity, signage and game boards
- Minimums apply

Inlay Printing

- 42" x 42" maximum die-cut dimensions
- 5' x 12' maximum laminate size
- 2-color maximum per inlay product
- Ideal for custom tabletops, countertops and store fixtures
- Minimums apply

In addition to these new products, Jaeckle Distributors continues to offer all of Pionite's specialty surfaces including **Metallics, Micastat®, Chemguard, Pearlescent, Melcor II®, Hi-Wear, Fire Rated, Thick Phenolic, Cabinet Liner and Backers.**

Please review the following pages for more Pionite Laminate information, or call your Jaeckle Distributor salesperson for questions and pricing on all of your Pionite Decorative Surfaces needs.

Pionite®

Leatherlam™

PIONITE® Leatherlam™ is made from real leather fibers using our patent-pending Thermally Fused Leather process to provide a kraft backing to the leather surface.

PIONITE® Leatherlam™ is ideal for a wide range of design applications. It offers the fabrication advantages of our standard Pionite® High Pressure Laminates and is easier to work with than natural leather hides, because it is already thermally fused to a rigid substrate. PIONITE® Leatherlam™ allows for 100% utilization of a 4' x 8' sheet. Because the high heat applied in the postforming process would damage the natural leather surface, PIONITE® Leatherlam™ cannot be postformed.

The PIONITE® Leatherlam™ surface displays resistance to hot water, impact and most household stains. Nominal dimensions are 58" x 96" x 0.045".

Markerboard Laminate

Pionite Markerboard Laminate provides a nonabsorbent, dry erase compatible surface suitable for a variety of applications for boardrooms, schools, clinics and hospitals. Type MB1 (.048") and MB2 (.028") are vertical grade laminates intended for nonpostforming, low abrasion applications. Markerboard laminate should not be used in horizontal applications.

Standard Laminate

Three standard grades of Pionite laminate are suitable for most applications.

General Purpose: Type G48 is most often used in horizontal applications where high impact resistance and a durable, decorative surface is required.

Postforming: Type F39 is designed for manufacturing countertops and other horizontal surfaces where the laminate may be heated and rolled over the substrate edge to eliminate seams.

Vertical Grade: Type F28 is designed for applications where impact resistance is less critical. Type F28 can also be postformed.

MelCor II

MelCor II laminate may be used in any application where a solid color edge is desired. MelCor II is intended for use in applications where the edge of the laminate contributes to the aesthetics of the final product. Pionite's patented manufacturing process provides a second generation color-through laminate that is more flexible and much less likely to chip than other color-through laminate.

Multi-toned edges or sandwich colors provide interesting design options. Grooves, bands, patterns, or lettering may be fashioned with the use of routers, engravers, or sandblasting equipment. Solid color MelCor II is also ideal for high-wear applications since gouges and cuts will not readily show. Due to its unique composition MelCor II laminate will vary in color from corresponding colors of Standard Pionite. Sample evaluation is recommended.

Resobak

Resobak is a single-ply backing sheet that can be applied to a substrate faced with high pressure decorative laminate. With proper application, Resobak will help to provide dimensional stability to the assembly, reducing the likelihood of warpage. Resobak sheets are available in either brown or black. A slight variation in color is normal and should be anticipated. Resobak sheets are not sanded.

Micastat

Micastat is an electrostatic dissipative laminate designed for work surfaces in the manufacture and assembly of static-sensitive electronic components. Micastat offers the user a static safe work surface with the performance of a high pressure decorative laminate. Due to the unique composition of this product, Micastat colors and corresponding colors in Standard Pionite are not exact matches. Sample evaluation is recommended.

Micastat offers:

- Low electrical resistance. Surface to ground less than 3 x 10⁸ ohms.
- Absolute charge drainage and zero voltage suppression. Micastat exhibits no voltage suppression and dissipates a 5,000 volt static charge to zero in less than 0.01 second per FTM-101C at 5 to 95 percent relative humidity.
- Micastat is postformable, but will require a larger radius than standard laminate.
- Resistant to most common solvents, hot solder and fluxes.
- Micastat is guaranteed to maintain its static control properties.

Pionite®

Fire Rated Laminate

Pionite Fire Rated laminate is designed for interior horizontal and vertical applications where a decorative surface must resist combustion and inhibit smoke production. Fire Rated laminate, Type K, retains the durability, ease of cleaning, and appearance (including color) of standard Pionite laminate. Pionite Fire Rated laminate is classified in the U.S. and Canada by Underwriters Laboratory, Inc. under File R6581. Pionite Fire Rated Backing Sheets are also available and provide fire ratings equal to fire rated decorative laminate of the same thickness.

Pearlescent Laminate

Pionite Pearlescent laminate showcases a dazzling array of patterns printed with metallic and pearlescent inks. Type G27 is a vertical grade laminate intended for non-postforming, low abrasion applications. Type F26 is a postformable, vertical grade laminate intended for low abrasion applications. Pearlescent laminate should not be used in horizontal applications.

ChemGuard

Pionite ChemGuard incorporates the decorative features of high-pressure laminate into a durable chemical resistant surfacing material. ChemGuard is available in any Pionite solid color, and can be made in thicknesses between 0.048 inches (1.2mm) and 1 inch (25mm). Thicker grades of ChemGuard can be used as self supporting worktops.

The unique manufacturing process of Pionite ChemGuard results in a product with chemical resistant properties throughout its thickness. This feature ensures that the ChemGuard surface is more durable and chemical resistant than competitive laminate, even after the surface has been scratched. Pionite ChemGuard's superior chemical resistant surface cannot be softened with heat for postforming.

Backing Sheets

Pionite Backing Sheets are applied to the back of a substrate that is faced with a high pressure decorative laminate. With proper application, Pionite Backing Sheets will provide dimensional stability to the assembly, reducing the likelihood of warpage. Pionite Backing Sheets are phenolic laminate that are not intended for decorative surfacing. A slight variation in color is normal and should be anticipated. Pionite Backing Sheets are available in either brown or black. Backing Sheets are normally sanded on one side, however, both sides can be sanded.

Thick Phenolic Core Laminate

Pionite Thick Phenolic Core Laminate is designed for applications where the decorative surface must contribute to the structural stability of the finished assembly. Thick Phenolic Core Laminate is available in the following configurations: decorative both sides; decorative one side, glueable one side; glueable both sides.

Metallic Surfaces

Pionite metallic surfaces are available in two different constructions:

All Metal: Pionite solid metals are aluminum sheets with an anodized finished surface to provide optimum decorative qualities.

Phenolic Back: Pionite phenolic back metallic laminates combine the aesthetics of solid metal with the ease of application of regular decorative laminates.

Cabinet Liner

Pionite Cabinet Liner provides a durable and attractive surface to the inside of cabinets and drawers. Cabinet Liner also imparts dimensional stability to substrate that is faced with high pressure decorative laminate.

Hi-Wear Laminate

Hi-Wear laminate is designed for applications requiring increased abrasion and scuff resistance. This product offers over five times the wear resistance of standard grade laminate.

Due to its unique composition Pionite Hi-Wear laminate will vary in color from corresponding colors of Standard Pionite. Sample evaluation is recommended.

Pionite® FRL

Introducing FRL (Fiber Reinforced Laminate) from Panolam/Pionite.

The Wall surfacing solution with endless other applications:

Store fixtures, restaurants, restrooms, retail counters, reception areas, hallways, hospitals, schools, hotels, garages, closets, trailers, banks, gymnasiums, airports, prisons, RV's, elevators, and any high-density public area.

Apply with Helmitin HEL776*5 *Clear or *Green 5 Gallon Waterbase contact glue. Coverage is 1,800 sf/pail. Product can be rolled or sprayed. See the I section for more specifications. Installation guides available upon request.

- Class A fire rated for flame spread and smoke development
- Solid, monolithic construction
- Durable, high-impact strength, 5 times greater wear resistance vs. standard laminate
- Availability in over 320 Pionite and Panolam colors and patterns!
- Available in 4 finishes: Suede, Soft Leather, Ashwood and Crystal.
- Available in 3' x 8' for wainscoting applications, 3' x 10', 4' x 8', 4' x 10', 5' x 8' and 5' x 10' for vertical applications.
- 5 sheet minimum for all FRL orders
- Available in .075 thickness only
- Easy to clean
- Extremely stable, ideal for areas affected by shifts in temperature and humidity
- Will not delaminate internally
- Can be applied to various substrates
- 2 seam treatments are available. Anodized aluminum molding in 4 profiles, 10 ft lengths, or, 100% silicone matching the specified color selected.
- GREENGUARD Indoor Air Quality Certification Scratch resistant
- Samples and product binder available upon request

Please contact your sales representative for more information.

Edgebanding

THE FIRST NAME IN THERMOFUSED PANELS

Jaeckle Distributors Stock Colors:

The Panolam Difference

Panolam brings you the beauty and richness of our natural world in one of the highest quality ThermoFused Melamine panels available today. Whether your design calls for deep, saturated color, the richness of a fine wood grain or the timeless appeal of stone, Panolam has the decorative surface you're looking for.

Synergy

With a selection of colors and patterns inspired by nature, Panolam TFM panels can be used for an entire project or combined with our matching line of Pionite High Pressure Laminates for a coordinated and unique style.

The Jaeckle Difference

FAST turnaround on any non-stock Melamine in either Panolam or Pionite colors: 2-3 weeks or less!

Low Minimums on non-stock Panolam Melamine colors: 20 panel minimum; may combine thicknesses of same width/length.

80 face minimum (40 sheets 2-sided) on any Pionite color made into Melamine.

Pionite High Pressure laminate available for all Panolam colors; 5 sheet minimum if not in stock.

Jaeckle Distributors, Family owned, quality products, great service.

We're dedicated to your success.

MelaQuinella

MelaQuinella panels offer premium hardwood veneer on one side and thermofused melamine on the other.

Some stock MelaQuinella colors at Jaeckle:

- A Select Hickory/S411 White
- A Plain Sliced Cherry/S411 White
- A Plain Sliced Red Oak/S411 White
- A Rotary Birch/S411 White
- A Rotary Red Oak/S411 White
- A Select Rotary White Maple/S411 White
- A Select Rotary White Maple/S402 Almond

Other benefits:

Our Panolam TFM is manufactured in Oshkosh, WI!
 4 core types available: Western Core, Eastern Core (Southern), MDF, or ZCore (NAUF = No Added Urea Formaldehyde)

“CARB Phase 1 Compliant! 100% of the Panolam Jaeckle Distributors sells contains a composite wood product that complies with CARB Phase 1 formaldehyde emission standards in CCR 93120.2(a)”

NuMetal™ High Pressure Metal Laminates

All NuMetals are suitable for interior use where decorative high pressure laminates or metal laminates are desired. Store fixtures, furniture, occasional tables, trim, kiosks, displays, signage and more are typical uses for NuMetal™ products.

- Available in aluminum, brass, copper and stainless steel finishes
- Many embossed surface textures for a wide range of design solutions
- Over 140 colors and patterns available
- Polished aluminum surfaces are anodized. Brushed aluminum surfaces and copper are lacquered

Thickness:

All laminates are .035" with the exception of Dekorial Patina and Unique Art, which are .050". Stainless steel has a slight seam at 24".

Fabricating:

NuMetal™ is fabricated with the same tools used on any high pressure laminate (special instructions are needed for fabricating stainless steel, please inquire). NuMetal™ products bond to various substrates the same as other high pressure laminates.

Adhesives:

Any contact adhesive or cold set adhesive normally used with high pressure laminates is suitable. Use only naphtha or benzene as adhesive cleanup. Do not use lacquer solvents or other adhesive solvents.

Storage:

Metal laminates should be stored face up in a cool, dry area in a completely supported flat position. Use a top sheet of chip board or similar material to hold sheets stored flat. Edge storage is not recommended.

Maintenance:

Clean surfaces with a soft cloth using household cleaners, waxes, window cleaning solutions, or ordinary soap and water. Good furniture or automobile waxes provide additional protection for all metal laminate surfaces.

Fire Rating:

Available upon request.

Postforming:

Many items are available in postforming grade by special order. Please inquire.

Balancing:

Counter balancing is necessary as with other high pressure laminates to prevent warping of the substrate. All NuMetal™ products are at home in any application where high pressure laminates would be used (vertical or horizontal).

Jaeckle Stock Patterns

Available in 4 x 8 sheets

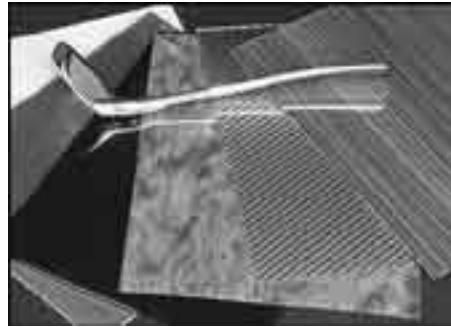

Item #	Description	Square Foot Price

CALL FOR PRICING and LEADTIME on 100's of ATI items!

MirroFlex™ Decorative Thermoplastic Sheets

MirroFlex™ is a high impact plastic with a decorative surface in laminate form. It is available in hundreds of designs and color combinations such as polished and brushed metallics, woodgrains, marbles, granites, specialty finishes and solid colors, interior and exterior grades, vacuum formable and scratch resistant grades, fire retardant 3D designs, perforated designs, tambours, mosaics and more.

Uses for MirroFlex™

Anywhere vertical HPL's would be used, such as:

- Imitation mirror toys
- Displays
- Signage
- Boats
- DIY projects
- Store fixtures
- Furniture
- Auto/RV
- Interior/Exterior
- Musical Instruments

Clearcore™ Acrylic Laminates

Clearcore™ laminates are made from clear thermoplastic resins, usually modified acrylic, reverse decorated with color pattern or metallic pigments to create an ultra-high gloss and durable laminate that can be used both for interior and exterior purposes. Clearcore™ is suitable for use in vertical and light duty horizontal applications where high pressure laminates may be appropriate. It is recommended for interior applications such as furniture displays, kitchen cabinet doors, wall décor, signage, and other interior design applications.

- More than 30 colors available including a large selection of solid metallic colors
- Woodgrains, metallics and specialty finishes are also available
- Standard size of 4' x 8', some 3' x 8' and standard thickness of 1/16"

Fabrication:

Clearcore™ laminates can be fabricated with standard woodworking tools that are appropriate for fabricating acrylic sheets. They can be routed, drilled, or sawed with tools suitable for acrylic laminates. Clearcore™ products bond to various substrates the same as other high pressure laminates. A fabrication manual is available with specific information.

Adhesives:

Contact adhesive or white glues in both cold and hot press applications. Use only naptha or benzene as adhesive cleanup. Do not use lacquer solvents or other adhesive solvents.

Forming:

Clearcore™ sheets can be positioned, membrane pressed, and vacuum formed to a low or moderate draw.

Mirroflex Samples and Literature Available Upon Request:

Item #	Description	Square Foot Price
ATI050001	Mirrorflex Brochure	n/c
ATI051002	Mirrorflex Structures Chain	n/c

Samples available, please contact Jaeckle customer service.

Metallic MirroFlex™ Trim Program

- Standard color range: polished aluminum, brass and gold; brushed aluminum, brushed brass, stainless steel; black, white and more
- With or without pressure sensitive adhesive
- Clear protective film on the front
- Standard roll size is .020 thick and 250' long
- Standard slit roll sizes are 1/4, 1/2, 5/8, 3/4, 7/8, 1/1.5, 2, 3, 4, 6, and 24 inch wide rolls
- Custom roll programs exist from .010 to .040 thick, 24 inch and 48 inch wide, any of our hundreds of finishes can be applied
- Uses: As metallic trim, high-speed edge banding, furniture inlays, plinth base, profile wrapping, appliqué on glass vacuum formed part (Mirror Tiles) and more

Standard NTP Roll Finishes

- N1 Polished Aluminum
- N2 Polished Gold
- N5 Brushed Aluminum
- N7 Brushed Brass

Other Finishes - minimums apply - please inquire

- N6 Brushed Stainless
- N25 Gloss Black
- N1X Exterior Chrome

Samples available, please contact Jaeckle customer service.

Jaeckle Distributors is proud to be the exclusive Avonite Surfaces distributor for 10 states in the Midwest: Wisconsin, Illinois, Minnesota, Missouri, Iowa, Kansas, Nebraska, North Dakota, South Dakota and the Upper Peninsula of Michigan.

Our inventory includes all 105 Avonite Surfaces sheet colors in 1/2" thick material, and 7 sink bowls in 3 different colors. Available next day to most customers. Please call to confirm delivery schedule.

Avonite Surfaces

Foundations Collection — Advanced Acrylic Surfacing

51 Advanced Acrylic colors. Competitively priced for residential and commercial needs, these 51 colors reflect nature's own earth tones and vivid accents. 100% Acrylic sheets in 1/2" and 1/4" thickness at 30" x 144" size. Can be custom sized up to 60" wide.

Studio Collection — Beyond Ordinary

54 Exclusive Surfaces unlike the others, dedicated to those who dare to put forth an original idea and take it beyond ordinary. Celebrate your sense of independence, style and profitability. Stocked in 1/2" x 36" x 120" sheets.

Seamless Sink Solutions — Acrylic Bowls

2 vanity bowls, 2 double kitchen sinks and 3 single bowl sinks available in White, Ivory and Cream. These lightweight affordable bowls, easily handled and installed, include a 10 year installed warranty.

Jaeckle Distributors sells Avonite Surfaces to Certified Avonite Surfaces Fabricators only. To become certified, or for any other questions on Avonite Surfaces, please contact your Jaeckle Distributors' salesperson.

Ordering Avonite Samples

- 1.7 x 2.35 and 2.35 x 4.7 samples available for any Avonite color, free of charge.
- Order samples via fax or email cs.samples@jaeckledistributors.com
- Larger samples can be ordered through customer service, charges apply.

Tub and Shower 1/4" Material

Avonite 1/4" sheets are perfect for use as tub and shower surrounds, or any wet wall applications in residential construction, universities, healthcare, and assisted living facilities.

The ease of installation lowers your labor costs, driving more profits to your bottom line. With 60" wide material you have no seams to deal with, no grout, no water penetration, no mold, no problems.

- Quick Installation
- No Water Penetration
- Quality Appearance
- Warrantied
- Non-Porous, Easy to Clean
- Bacteria and Fungal Resistant

Call Jaeckle Customer Service for Pricing, Availability or Literature.

Karran

Self-Rimming Solid Surface Sinks

Strength, Beauty and Durability you can depend on for decades.

*ALL sinks available in White or Bisque

50-Year Warranty

Karran sinks are produced to the highest standards. Your sink is warranted against material and manufacturing defects for 50 years.

Stain Proof

Karran is invulnerable to a hideous array of stains, from coffee, to ketchup, to red wine-even hair dye! In fact, Karran is guaranteed never to stain...EVER!

Heat Resistant

Karran's high density acrylic resists heat up to 365°F!

Thermal Resistant

Karran is totally unaffected by both boiling hot water and ice cold water. Guranteed against thermal cracking!

Bacterial Resistant

Because Karran is impervious to moisture, bacteria have no chance to settle in, making the kitchen a safer place for your family.

Impact Resistant

As if Karran weren't plenty tough enough, each sink is backed with fiberglass for extra impact strength.

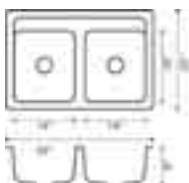

Scratch Resistant

Karran cleans up with the mildest detergent, but stands up perfectly well to Comet, even metal scouring pads.

Lansen Edge Sinks

Edge is a stunning leap forward in the technology of producing an undermount sink. The technology of the Karran undermount has been combined with the beauty of Lansen stainless steel by a patented rim system created from a resin matrix. The new Edge sinks can be seamlessly installed under both laminate and solid surface, just like a Karran sink. Use Karran Seam Adhesive (below) for use with Karran Edge Sinks under laminate.

Protective Finish

This Butcher Block top is intended to be used as a true cutting surface. It is coated with an acrylic finish, DURAKRYL 102, which does not require any maintenance. It is not necessary to sand off this finish prior to using the top, as it is approved for foodservice use. The finish is formulated to repel most household solvents. Stains can be cleaned off with fingernail polish remover or bleach. Neither of these two substances can hurt the finish. Although the finish is durable, it will scratch.

Clean it like you would any cutting surface, not allowing water to remain on the block for any length of time. To help preserve your block if used as a cutting surface it would be advisable to periodically reseal ONLY the area in which you cut on. Mineral oil can be used. If it becomes necessary to refinish your block due to usage, we suggest sanding the finish off and applying either an oil finish or resealing with "Good Stuff" Urethane Gel clear protective finish.

Item #	Description	Unit	Ctn Qty	Unit Price
MICUSP	Good Stuff Urethane Seal - Pint	EA	1	\$14.07
MICUSQ	Good Stuff Urethane Seal - Quart	EA	1	\$19.25

NBL® (No Black Line) 3-Ply Wood on Wood Laminate

- Prevents application problems such as bubbling, solvent & glue seepage, telegraphing & checking
- Will accept water-based adhesives
- Pre-flexed & tenderized allowing it to wrap to a 2" radius
- No unsightly edge lines
- Outstanding dimensional stability
- NBL® is pre-sanded and is available in more than 90 species

FORMWOOD® Paper-Backed Veneer

- Available in 10 mil, 20 mil & 30 mil backed veneers
- Pre-Sanded and available in 90 species for quick shipment
- Pre-flexed & tenderized allowing it to wrap a 1" radius
- Also available and stocked (2 x 8's) in Cherry, Maple and Oak with PSA (peel and stick) backing

DuraBack Veneer

- Durability of phenolic with the flexibility of paperbacked wood veneer
- Applies like a laminate without unsightly edges (back is color matched to face)
- DuraBack has a water-resistant backing that provides a moisture barrier
- DuraBack accepts pre-finishing prior to lamination
- DuraBack is highly resistant to damage (RESISTS TEARS)
- DuraBack is dimensionally stable (RESISTS SHRINKAGE)
- Call for pricing and availability

Jowat 28680 Series Hotmelt Cartridges

- Medium high viscosity hot melt. Very economical with good color and heat stability
- Suitable for primed HPL, solid wood, veneer, PVC, and resinated paper edgebands. Can be used for soffforming operations
- Application Temp: 190°-210°C (374°-412°F)

Item #	Description	Unit	Ctn	
			Qty	Full Ctn
JOW28680	48 Each Natural Cartridges (34 lbs./ Carton)	EA	1	\$137.10
JOW28681	48 Each White Cartridges (34 lbs./ Carton)	EA	1	\$164.52
JOW28682	48 Each Brown Cartridges (34 lbs./ Carton)	EA	1	\$170.00
JOW28683	48 Each Black Cartridges (34 lbs./ Carton)	EA	1	\$170.00

Helmitherm 470 Edgebanding Hotmelt Pellets

- Polyolefin edgebanding hotmelt with good heat resistance, long open time, and excellent machining
- 470 is used on automatic edgebanding machines for difficult to bond edges such as unprimed HPL and solid wood
- 100% solids with a 1 year shelf life (at ambient temperature)
- Melt viscosity: 42,000 cps @ 180 C
- Application Temp: 200 - 220 C
